

Team Collaboration Tool

Description

A collaboration tool where an admin can create teams, users can create a login and join teams. Users can add projects and see an overview of all the tasks that are involved in the project and complete them. Users can add new tasks when needed

User Stories

Story add user

As a user, I want to be able to add myself to the system so that I can later be added to teams and work on projects

Wireframe

A hand-drawn wireframe of a registration form. The form is a rounded rectangle with the title "Register" at the top center. Below the title, there are four labels on the left: "Name", "Email", "Password", and "Specialisation". To the right of each label is a horizontal input field. At the bottom center of the form is a "Submit" button. To the right of the main form box, there is a separate rounded rectangle containing the word "Register", with an arrow pointing from it towards the main form.

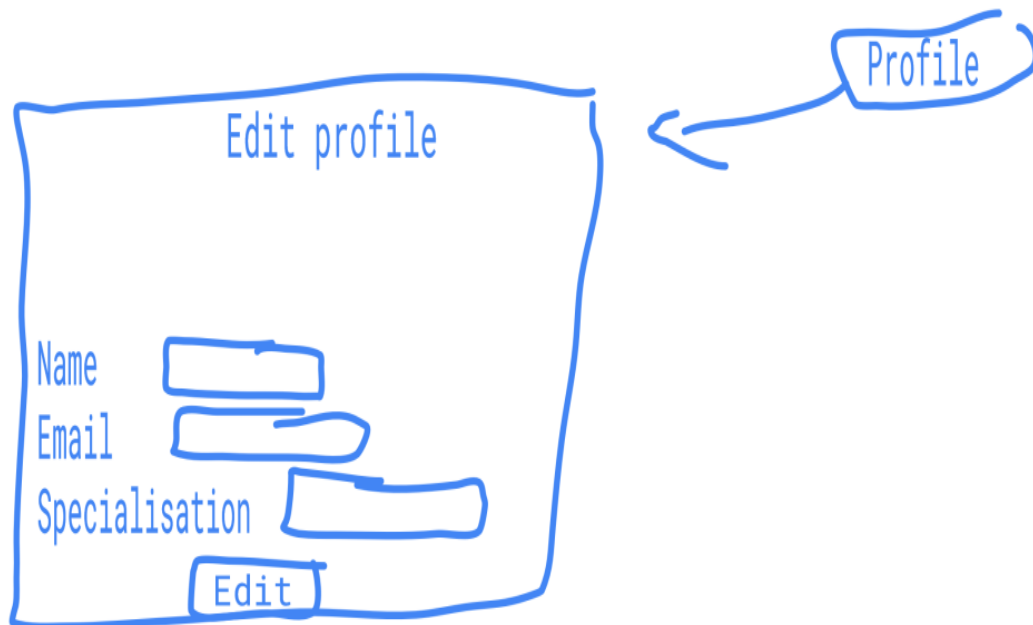

Acceptance Criteria:

- Users can register themselves in the system

Story update user info

As a user, I want to be able to update my profile information (name, email) to keep it accurate and personalized.

Wireframe

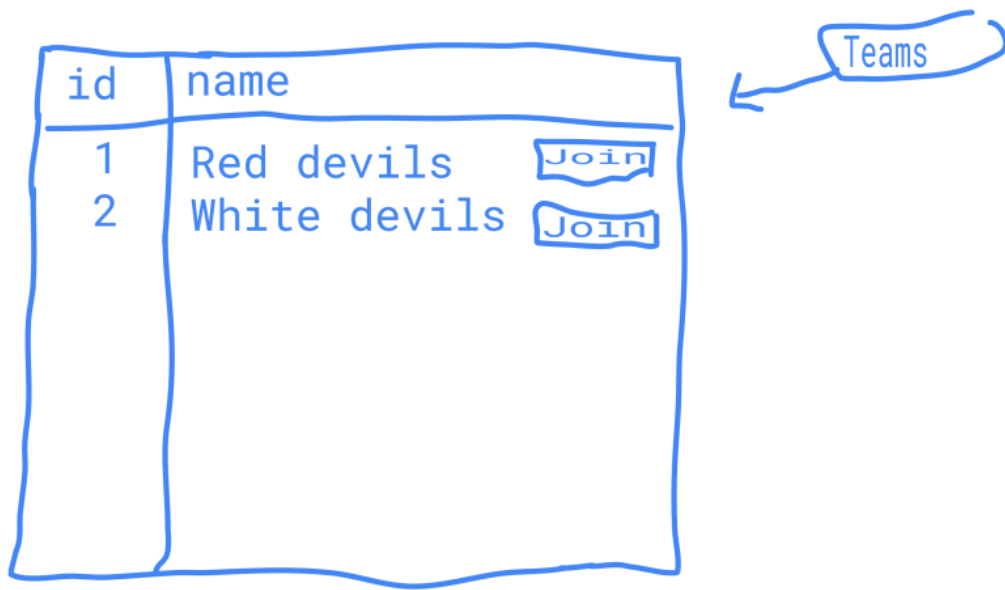

Acceptance Criteria:

- Users can access and edit their profile information.

Story overview Teams

As a user I want an overview of the teams so I can see what teams there are

Wireframe

id	name	
1	Red devils	Join
2	White devils	Join

A hand-drawn wireframe of a user interface element, likely a table or list of teams. The table has three columns: 'id', 'name', and an empty column for actions. It contains two rows of data: '1 Red devils' and '2 White devils', each with a 'Join' button in the action column. To the right of the table, there is a label 'Teams' in a rounded rectangle with an arrow pointing to the table.

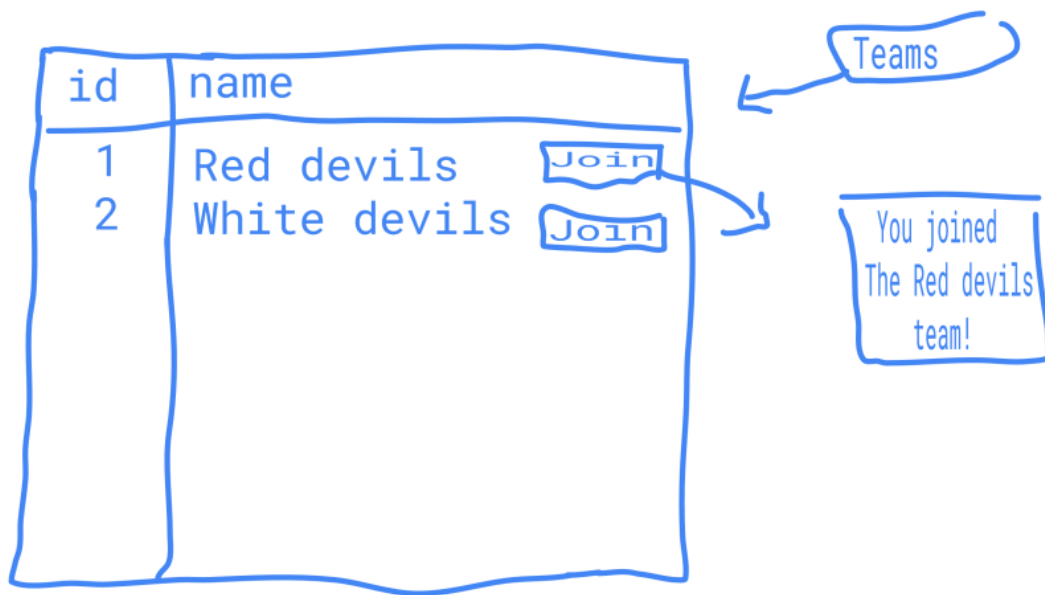

Acceptance Criteria:

- User can see the different teams

Story add user to team

As a user, I want to join a team so that I can collaborate with others and contribute to our shared goals.

Wireframe

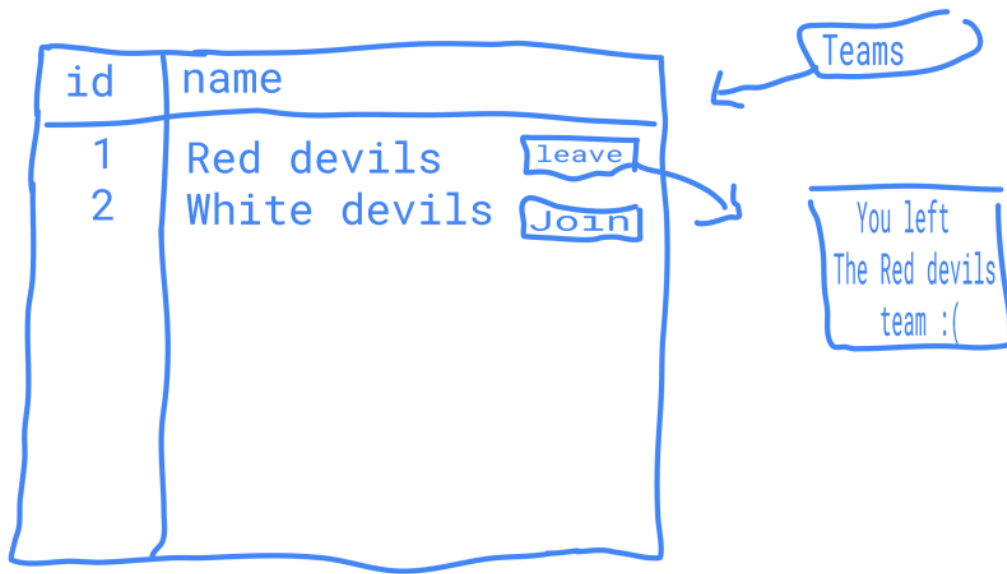

Acceptance Criteria:

- User can add themselves to a team
- User gets a notification that he joined the selected team

Story remove user from team

As a user i want to be able to remove myself from a team so that I can discontinue my involvement from the team

Wireframe

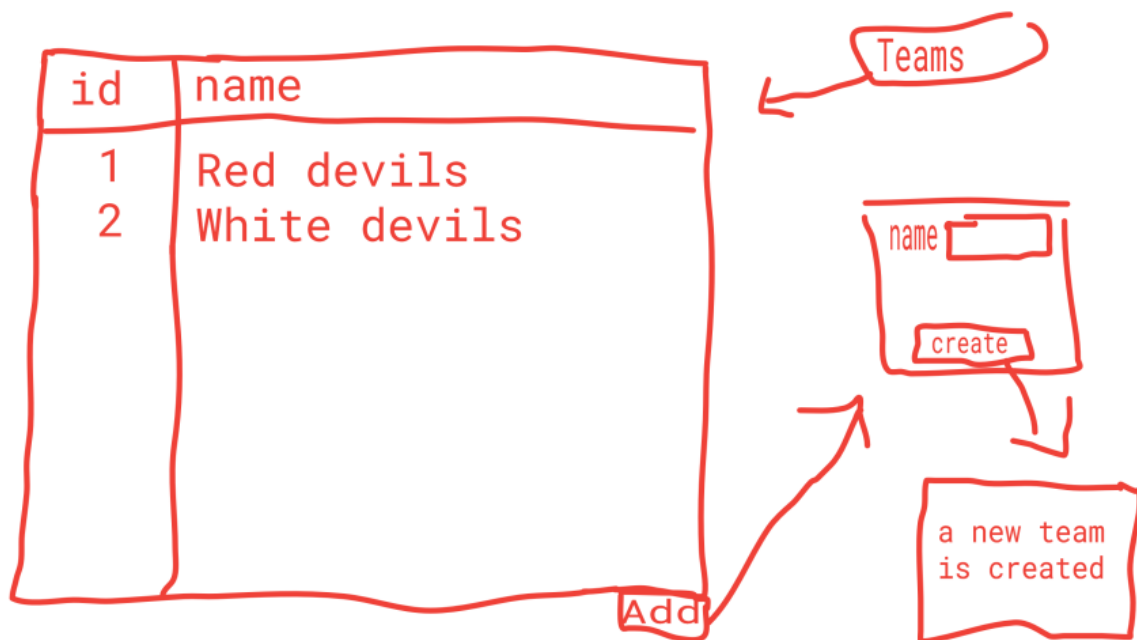

Acceptance Criteria:

- User can remove themselves from a team.
- User gets a notification that he left the selected team

Story create team

As the admin I want to be able to create a team so users can start the collaboration

Wireframe

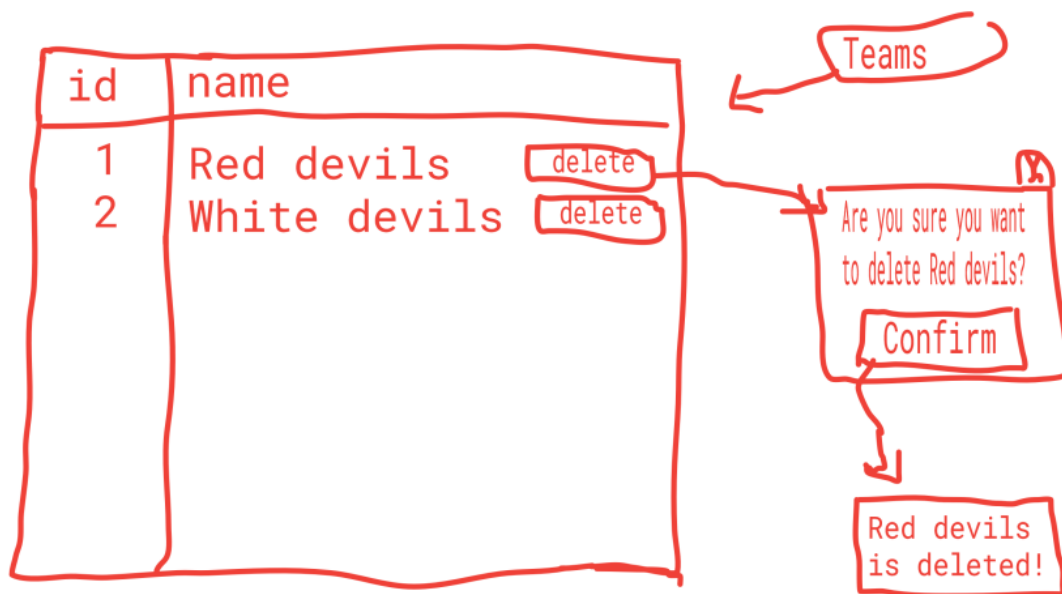

Acceptance Criteria:

- Admin can create a team.
- After creating a team the admin gets a confirmation

Story disband team

As the admin I want to be able to disband a team so it doesnt show up anymore

Wireframe

Acceptance Criteria:

- Admin can disband a team.
- Admin gets asked to confirm before deleting a team
- Disbanding a team removes it from the system.

Story remove user

As the admin I want to be able to remove users from the system so that ex-employees can't access the data

Wireframe

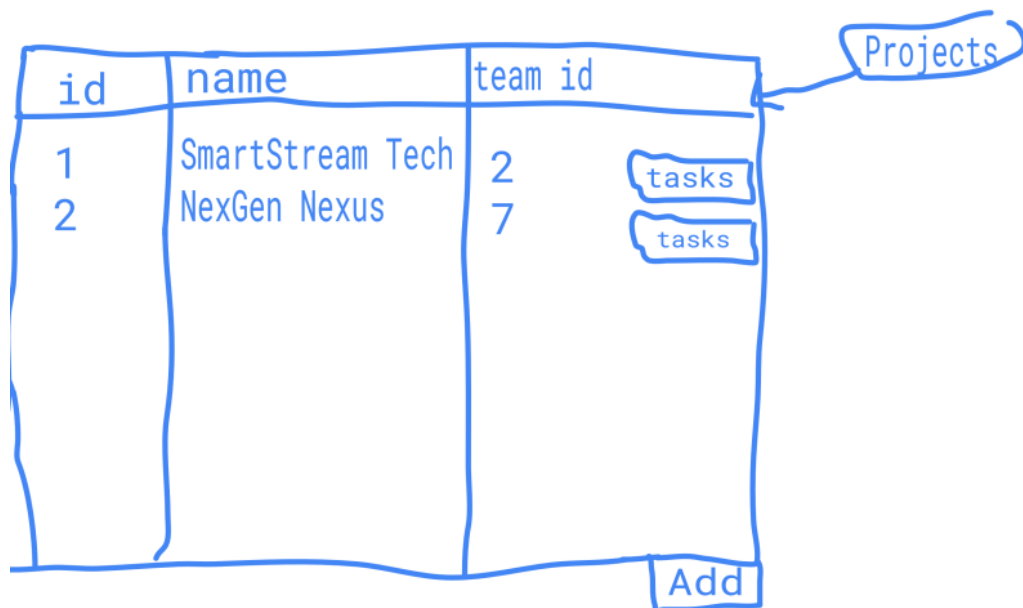

Acceptance Criteria:

- Admin can remove users
- Admin gets asked to confirm before deleting a user
- A removed user should be disassociated from any team

Story Project Overview

As a user i want an overview of the projects I'm involved in so i can keep track of them

Wireframe

id	name	team id
1	SmartStream Tech	2
2	NexGen Nexus	7

Projects

tasks

tasks

Add

Acceptance Criteria:

- User can see an overview of his projects

Story Admin Project Overview

As an admin i want an overview of all projects so i can see all active projects

Wireframe

A hand-drawn wireframe of a table titled "Projects". The table has two columns: "id" and "name". It contains two rows of data. The first row has "1" in the "id" column and "SmartStream Tech" in the "name" column. The second row has "2" in the "id" column and "NexGen Nexus" in the "name" column. To the right of each row is a "delete" button. Below the table is an "Add" button. A callout line points from the "Projects" label to the table header.

id	name
1	SmartStream Tech
2	NexGen Nexus

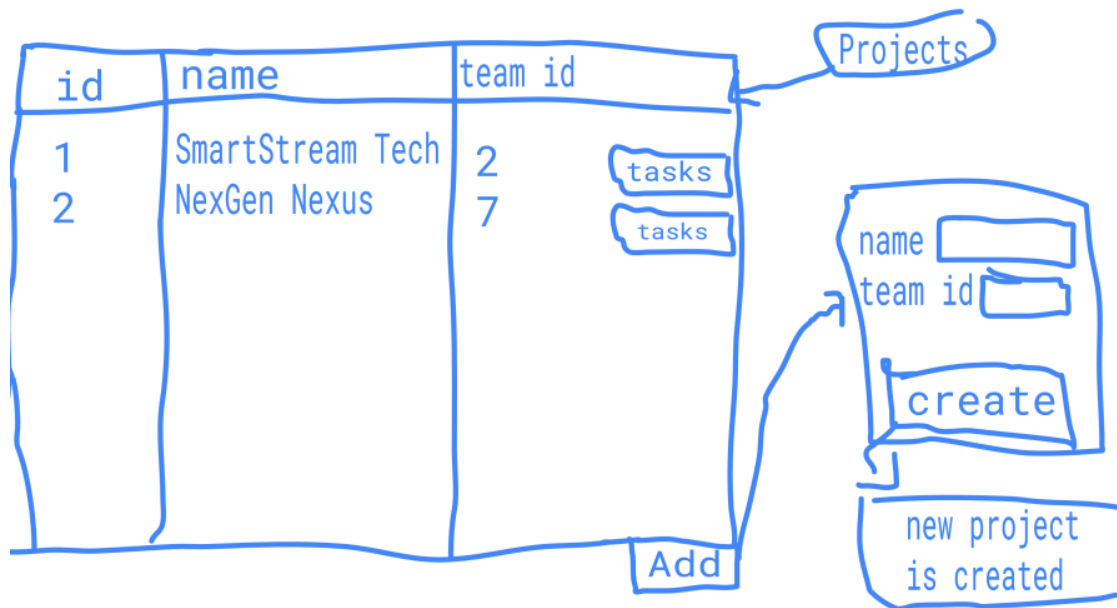

Acceptance Criteria:

- Admin can see an overview of all projects

Story add project

As the user i want to be able to create projects so that my team can start collaborating on the project

Wireframe

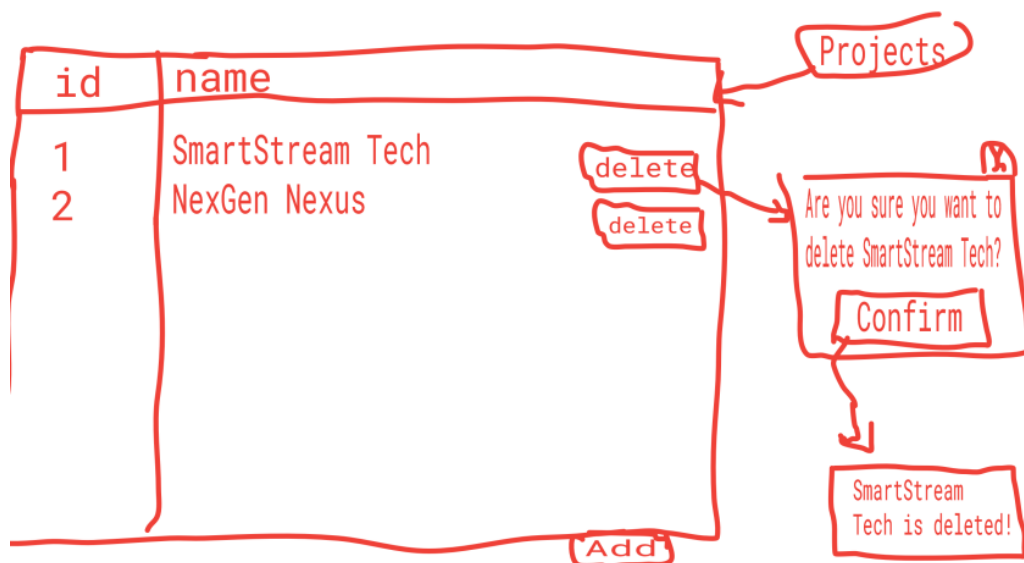

Acceptance Criteria:

- User can create projects
- User can appoint team for a project

Story remove project

As the admin i want to be able to remove projects so that completed or unneeded projects are removed

Wireframe

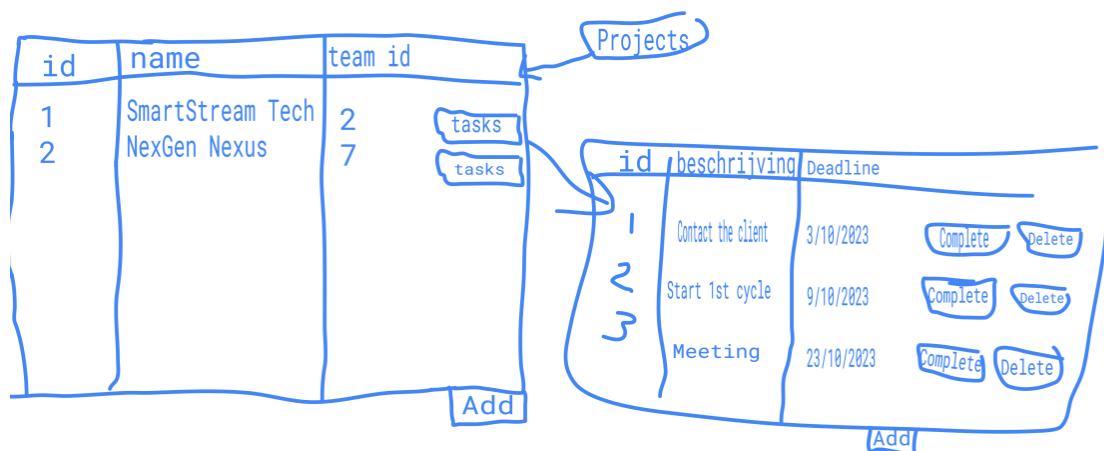

Acceptance Criteria:

- Admin can delete projects
- Deleting a project also deletes related tasks

Story Task overview

As a user I want to see all the tasks per project i'm involved in so that i can see what needs to be done

Wireframe

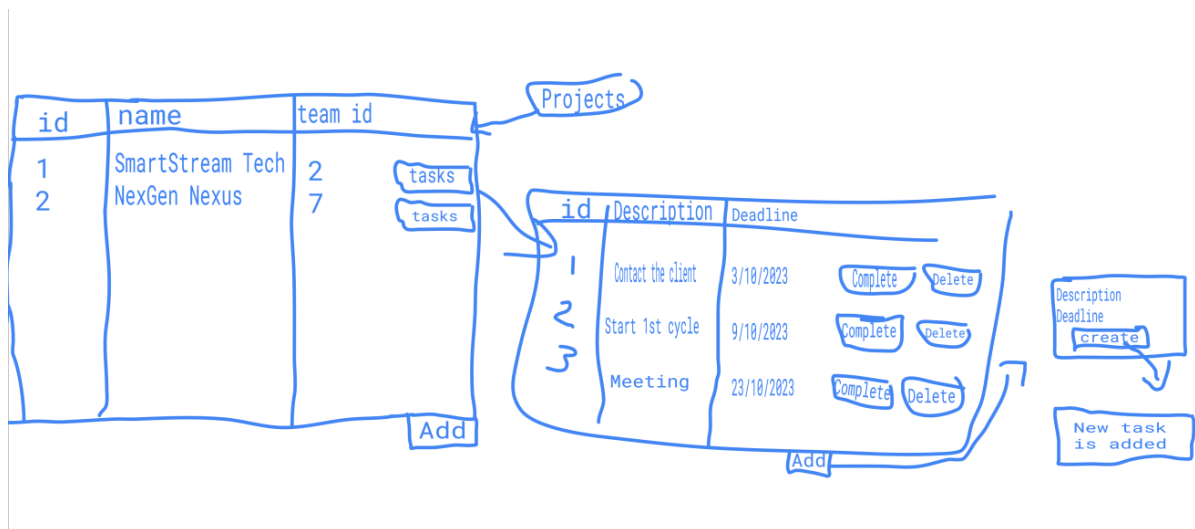

Acceptance Criteria:

- User can see all tasks of his projects

Story add tasks

As a user i want to be able to add tasks to the projects my team is doing so that the work can be divided into small tasks

Wireframe

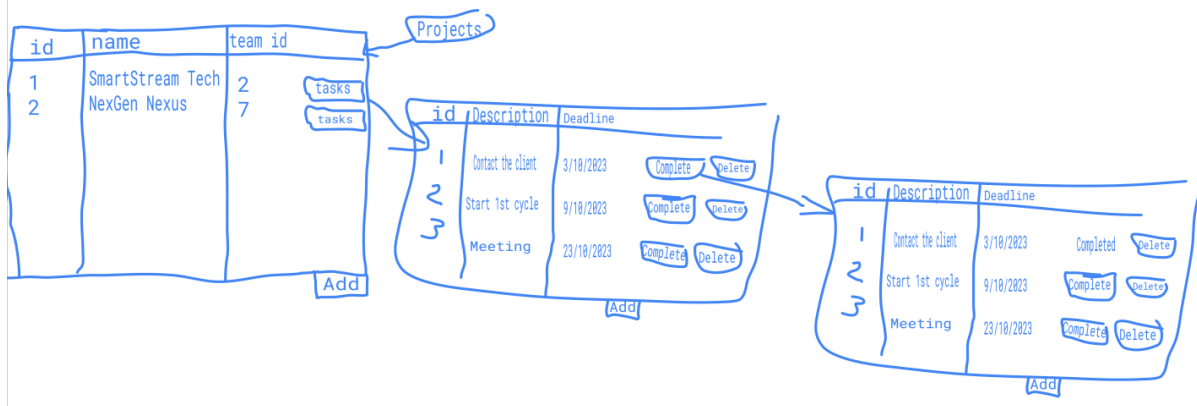

Acceptance Criteria:

- User can create tasks

Story complete tasks

As a user i want to complete tasks so the team can see what the progress of a task is

Wireframe

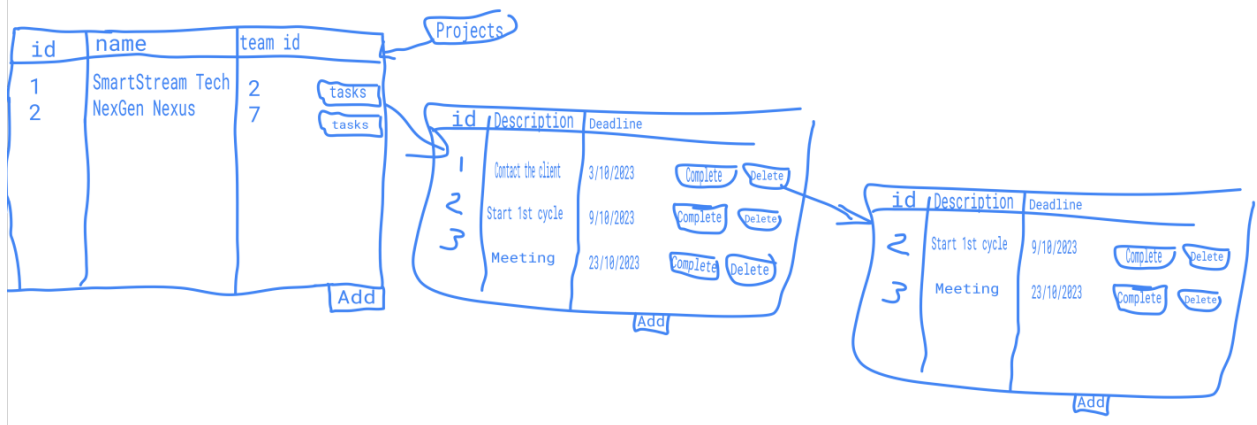

Acceptance Criteria:

- User can complete assigned tasks

Story remove tasks

As a user i want to be able to remove tasks from the projects my team is doing so that we can streamline our project and maintain clarity in our goals.

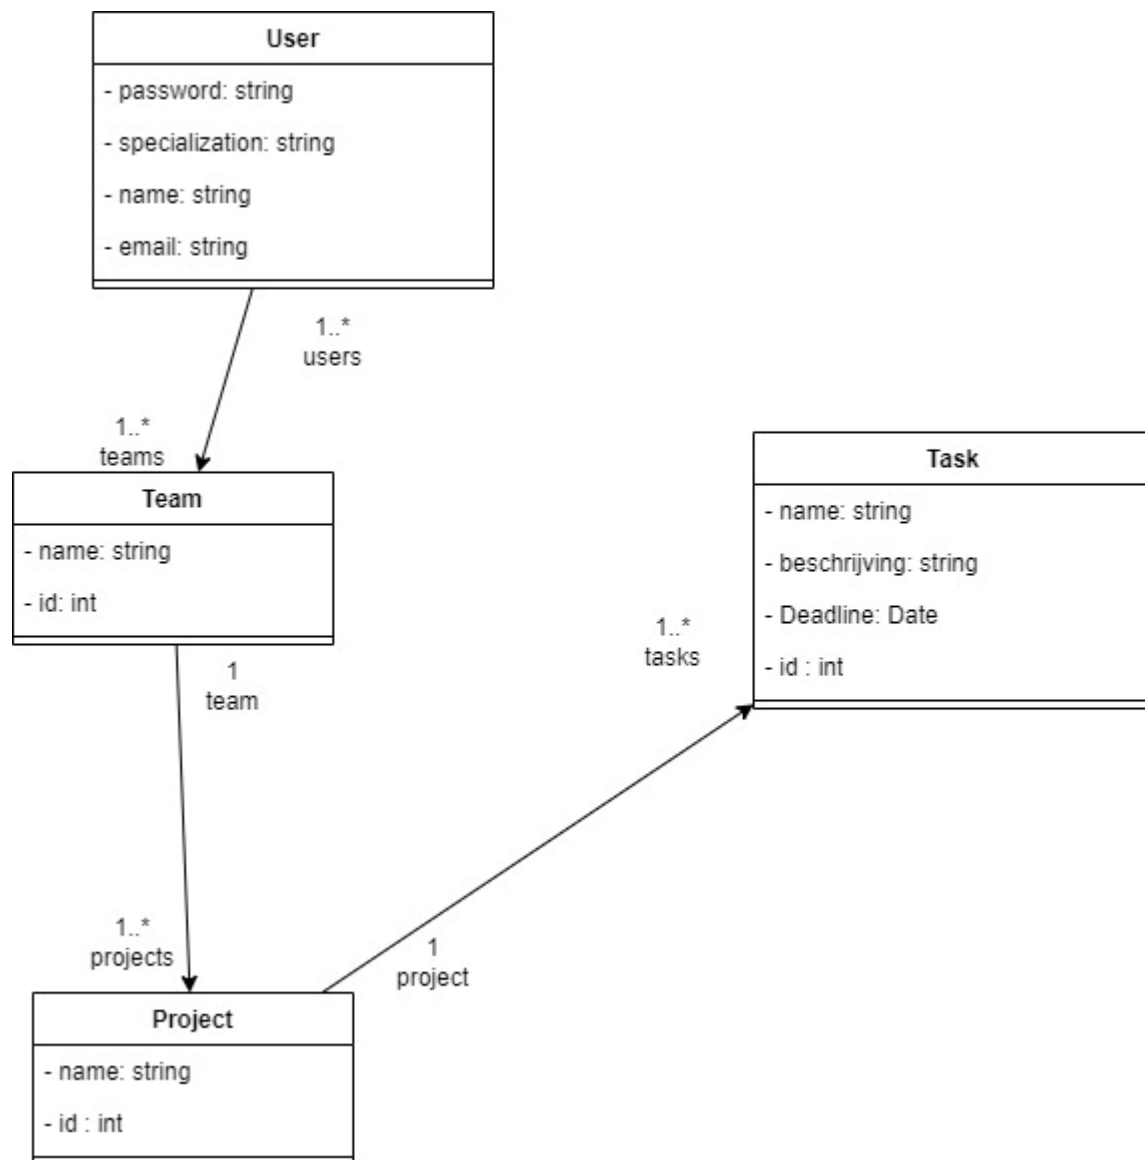

Wireframe

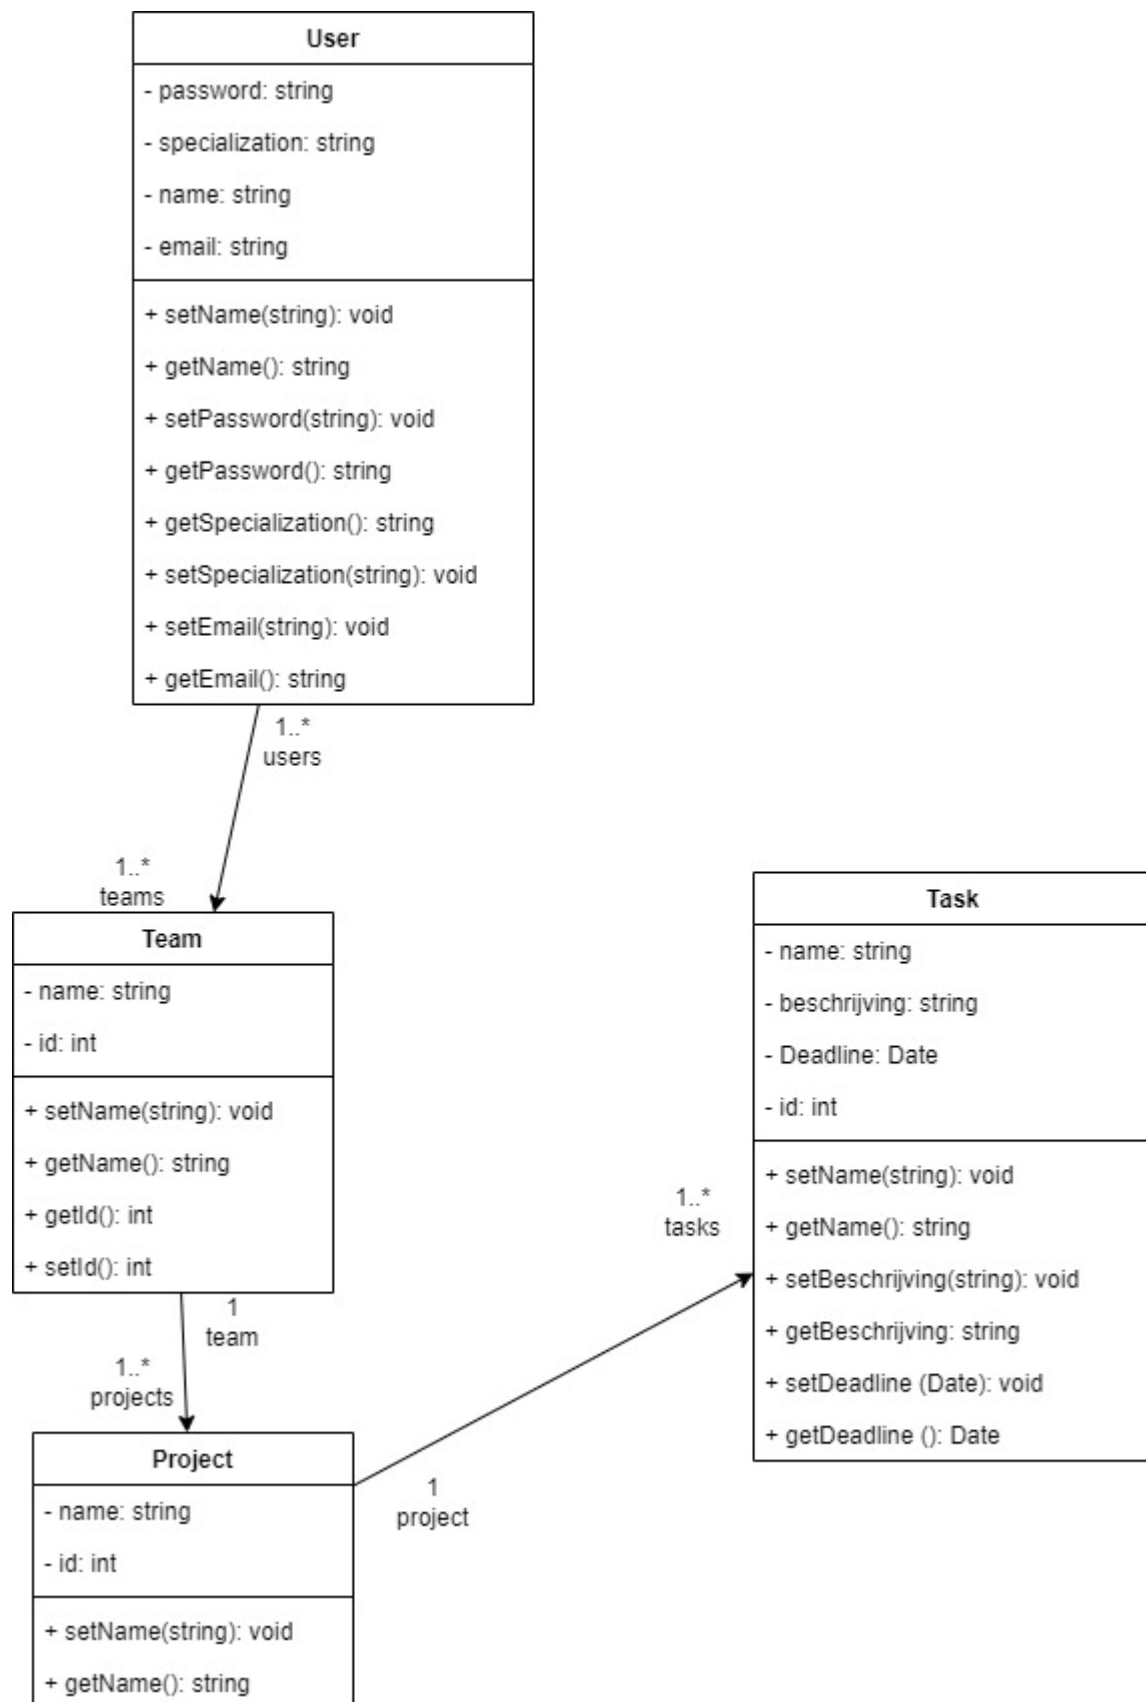

Acceptance Criteria:

- User can remove tasks
